

KOKODE. Private AI. Right here.

AI for the work you can't send out.

KOKODE installs AI that runs inside your organization, on a device you provide.

Everyday use needs no internet connection.

Introduction

The challenge: sensitive data

The work you want AI to do holds data that cannot leave.

Japan's Personal Information Protection Committee also urges caution when entering personal information into generative AI services.

If nothing changes

**The most sensitive work
stays without AI.**

KOKODE

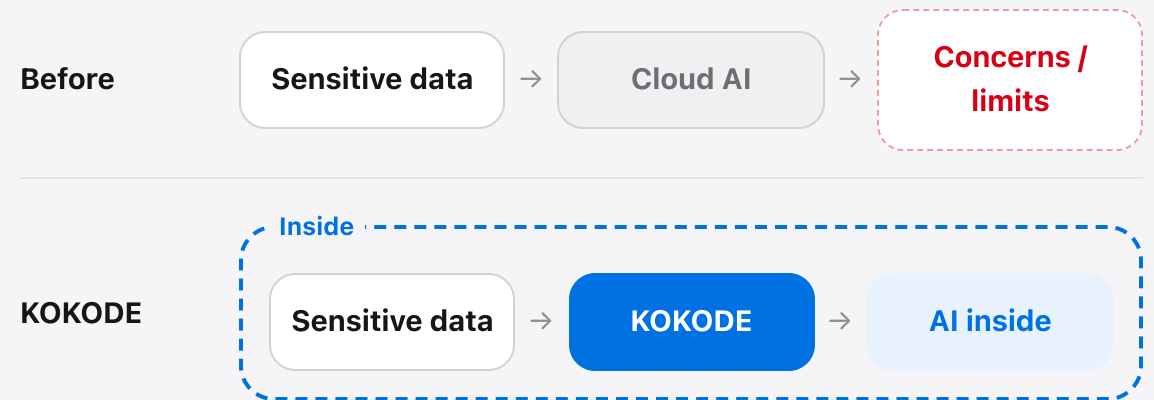

AI that runs inside, for your organization.

※Configured not to send sensitive data to external LLMs during normal operation

Where data goes

Sensitive data goes to AI inside.

※Configured not to send sensitive data to external LLMs during normal operation

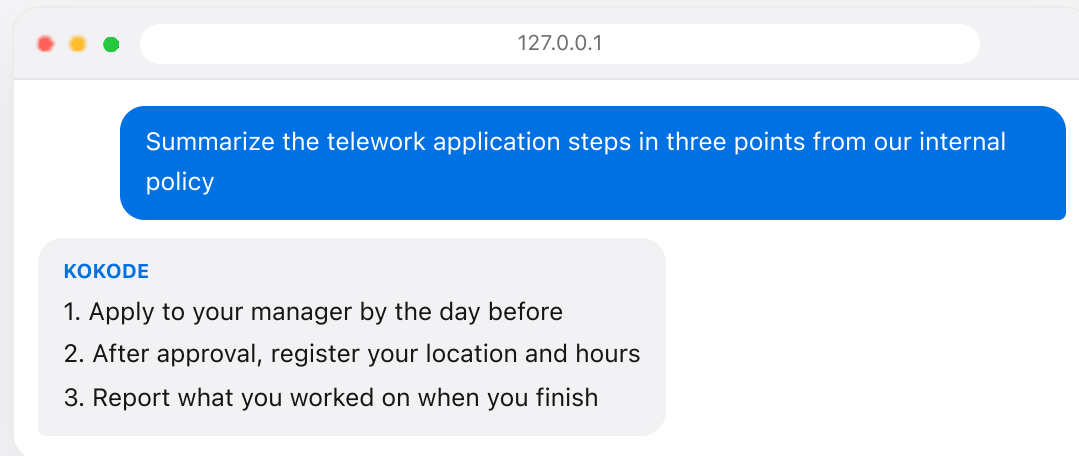

Where sensitive data goes: cloud AI and KOKODE

How to use it

Open the Mac app. Work as usual.

Ask through chat, as with ChatGPT.

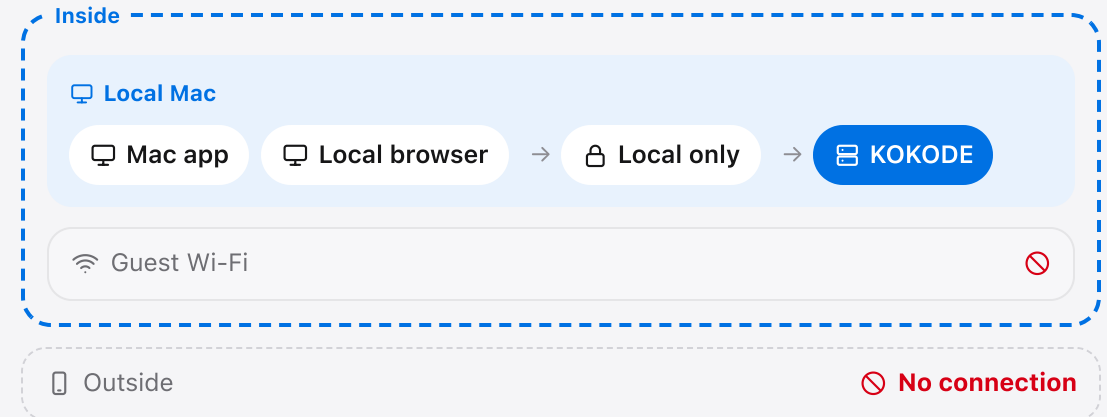

KOKODE chat on an employee's PC

※Illustrative screen

Connection boundary

AI on your Mac. Private by design.

The AI and chat interface run on the Mac where KOKODE is installed.

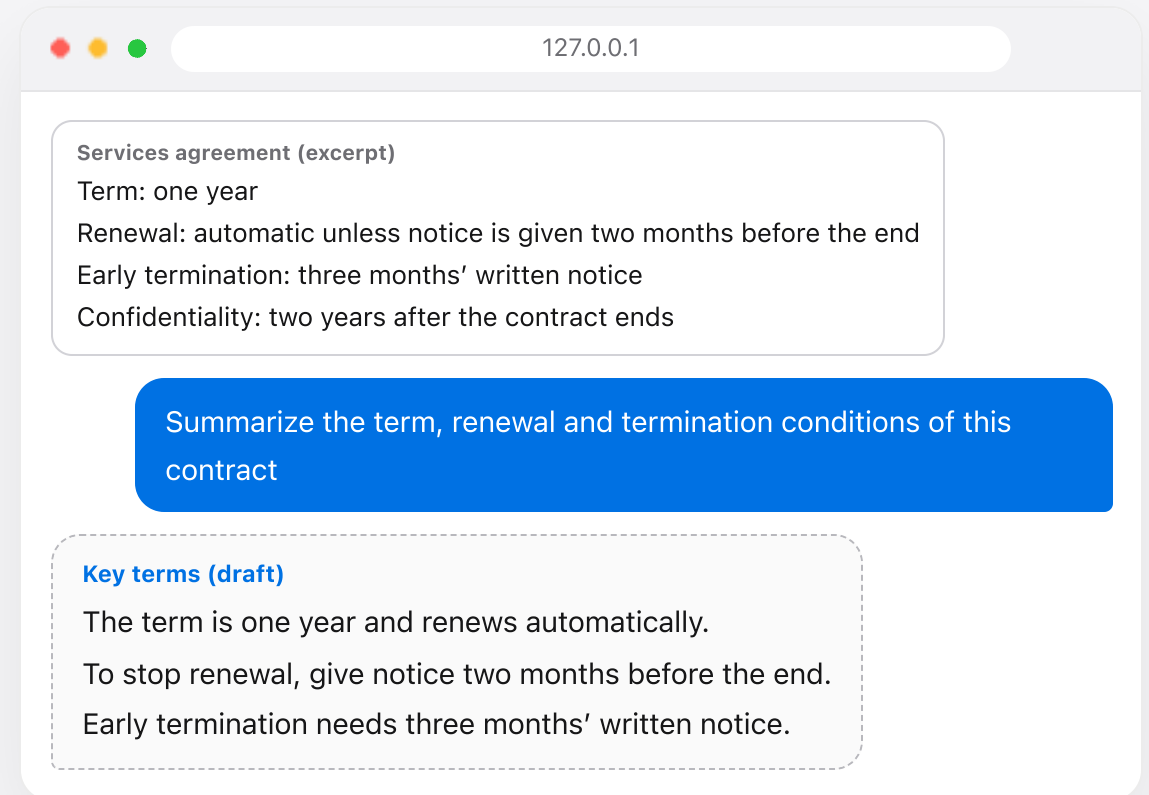

The local UI is accessible only from the Mac where KOKODE is installed

Example: contracts

Summarize a contract inside.

Pull out the term, renewal and termination conditions and draft the key points for your staff to review and finish.

Drafting key points from a fictional contract

※Fictional data

※Illustrative screen

※AI output is a draft. Your staff must review the content and make the final judgment.

Example: medical institutions (referral letters)

Draft a progress summary inside.

Draft a referral-letter summary from clinical progress notes, which the clinician reviews and finishes.

※Start with information search, summaries, document drafting and research support rather than diagnosis itself. Healthcare professionals perform the final review and judgment.

The illustration shows a web browser window with a title bar containing three colored circles (red, yellow, green) and the address '127.0.0.1'. The main content area is white and contains a rounded rectangle with a light gray border. Inside this rectangle, there is a section titled 'Progress notes' in bold. Below the title, the text reads: '72-year-old woman', 'Admitted with a right femoral neck fracture', 'Day 14 after hip hemiarthroplasty', and 'History: hypertension and type 2 diabetes'. To the right of this section is a blue button with white text that says 'Summarize this patient's progress for a referral letter'. Below the button is a dashed-line box containing the text 'Referral progress summary (draft)' in blue, followed by three lines of text: 'Hip hemiarthroplasty performed for a right femoral neck fracture.', 'Recovery is progressing well; gait training with a walker continues.', and 'Oral medication continues for hypertension and type 2 diabetes.'

What KOKODE installs together

With KOKODE

**AI inside becomes
an everyday work tool.**

Your data and workflows stay under your control.

Updates and backups

**Keep updates and backups
under your control.**

Getting started

**Buy once,
no monthly fee.**

Setup options

Choose your setup, then start using it.

- 1 Choose your setup plan
- 2 Prepare your own Mac mini
- 3 Set up yourself, remotely or on-site

Talk with us

**Bring one task
you want AI to handle
but cannot send to the cloud.**
